# ABOUT ATARI

Atari, Inc., founded in Sunnyvale, California in 1972 by Nolan Bushnell and Ted Dabney. The company was a pioneer in arcade games, home video game consoles, and home computers. In 1977 Atari launched the legendary Atari 2600.

This was the first mass market home console and sold over 30 million units. Atari played a major role in shaping the electronic entertainment industry in the 1970s to the mid 1980s.

*"Everyone who's ever taken a shower has an idea. It's the person who gets out of the shower, dries off and does something about it who makes a difference." – Nolan Bushnell*

The yars are under attack and the Razak system needs you to help save them from imminent destruction in this shooter that combines that 360-degree playfield mechanics of Asteroids with mechanics akin to Breakout and other classics. One of the most impressive visual experiences on the Atari 2600, this space fighter has you flying across the surfaces of exotic planets and shooting down enemy fighters as they encroach upon you.
