ABOUT MEGA CAT STUDIOS

Established in 2015, Mega Cat Studios is a publishing and development company that specialises in releasing new games for classic gaming systems.

The team has always aimed to recreate the experience of "being in the back of your mom's van coming back from the department store, opening up a game and reading the instruction manual on the way home". To that end, Mega Cat has released a variety of new games for old platforms in fully packaged format, complete with manual.

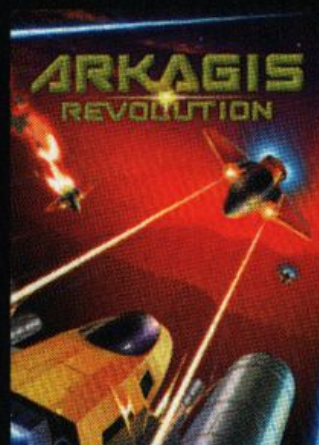

This new collection for Evercade brings together some of the latest and greatest Mega Cat games, promising hours of retro-inspired fun.

ARKAGIS REVOLUTION

The year is 2612, and the Martian nation of Arkagis is heavily contested. As Lyn, an Arkagian rebel with no desire to live either under the previous dictatorship or the rule of the United Space Colonies, it's time to fight back against oppression with the power of the experimental ARX-01 spaceship. Explore levels, blast enemies and win your freedom in this spectacular top-down rotating shoot 'em up adventure.

FACT

The original 16-bit console this game was built for doesn't have hardware rotation; the impressive "mode 7"-style effects were built from scratch!

ODEV WILL TOO MD

You are a homunculus searching for the meaning behind your existence. Were you created? Have you always been here? Is your existence your own, or shared and moulded by others? Or is it perhaps something far more absurd? Take on your own existential journey into the nature of being in this peculiar platformer!

TIP

Jump on or slide into enemies to defeat them — but be careful, you'll bounce away when you do so!

ROMEOW AND JULICAT

Romeow loves Julicat, and the best way for him to prove that is by playing his instruments and singing his songs! Help him do just that by placing as many pieces on the puzzle board as you can. Filling a horizontal or vertical line all the way across the board will clear it, leaving more space for you to play, and placing the required number of pieces will take you to the next stage.

TIP

You get a bomb that clears the board every time you beat a level — save 'em for the harder stages if you can!
